

# BUGS IN NOTES APPLICATION I HAVE OBSERVED

1)In the code only post method is mentioned it will not fetch the html page which we have to give input.so I added get method.

2)As it is a post request form should be there in place of args.

3)Action is not mentioned.

4)I have implemented the all the other things which are missed.

**I HAVE BUILT A BASIC APP WITHOUT ANY COLOURS AND ALL.**
